

Quick Duct Adapter Spiral to Express Duct Connection

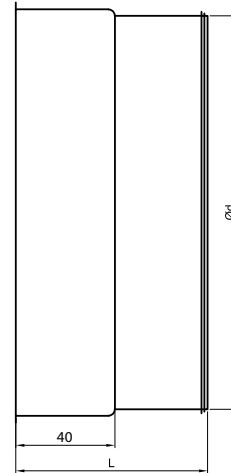

**FRESH AIR
SUPPLIES**

Description

The Quick Duct Adapter is designed to connect standard circular spiral ductwork to Quick / Express (clamp-together) duct systems. The adapter fits into the end of spiral duct and forms a turned-out edge profile, enabling secure connection using a Quick clamp. Manufactured from galvanised steel, it provides a simple and reliable transition between slip-joint spiral duct and clip-together systems, suitable for both supply and extract ventilation installations.
